## Sustainability Report 2022

Nissi Beach Resort recognises its responsibility and is committed to continually improving its performance towards a sustainable future.

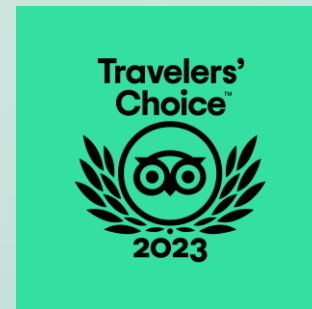

We do care about our environment

# Our Awards

We do care about our environment

# Environmental Actions

Whilst we strive to enhance the quality of our guest's stay and ensure they take home memorable experiences, we do so with respect to the local environment reducing the impacts for the benefit of the local community in which we operate.

We do care about our environment

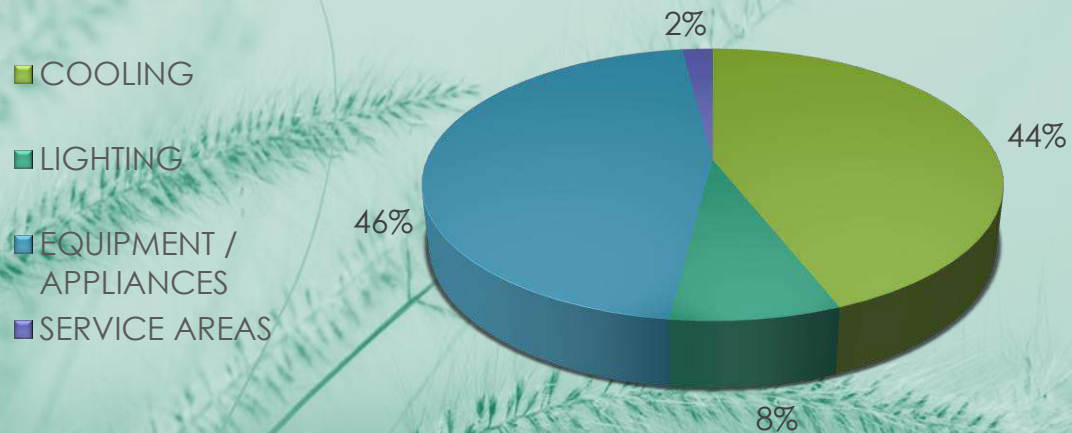

# Electricity Consumption

(kWh/guest night)

## Total Electricity Load

We do care about our environment

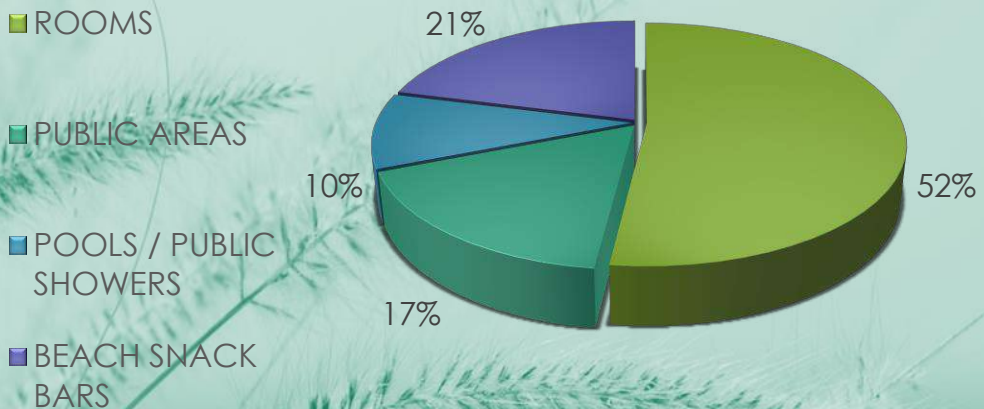

# Water Consumption m<sup>3</sup>/Guest Night

Water consumption has remained stable over the years, albeit offering free showers at the beach to all visitors since a few years.

## Total Water Consumption Distribution

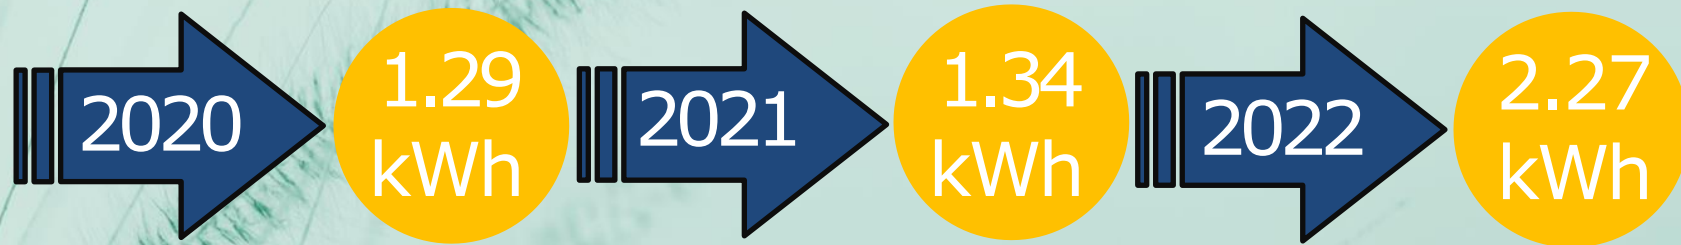

We do care about our environment

# Petrol and Gas Consumption

(kWh per guest night)

The relatively high gas consumption is due to increased sales at the beach outlets.

We do care about our environment

# Waste Management

We emphasize the importance of waste reduction and management by undertaking waste separation to allow efficient recycling.

The recycle process is now done throughout the complex, including the beach hence increasing the quantity of recycled items by 30% compared to previous year. This means a great waste reduction and minimisation of the environmental pollution.

We do care about our environment

# Recycled Waste

	2020 (kg)	2021 (kg)	2022 (kg)
Plastic	36120	39060	55860
Paper	11100	11400	32100
Glass	21600	18000	20400

We do care about our environment

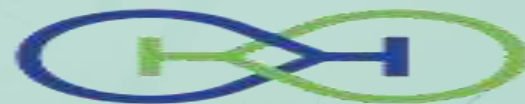

# Reducing Environmental Footprint

During 2021-2022, our target was to reduce the usage of single use plastic by 80% knowing it is the main cause for the ocean crisis.

All glasses, straws and food or other containers in plastic have been replaced by paper or recycled washable acrylic glass containers. The remaining plastic is collected and recycled by Green Dot.

# Reducing Environmental Footprint

Starting coming June, our resort will start participating in the governmental scheme - promoting circular economy in hotels in an effort to transform our resort into a green, gold circular economy hotel.

A lot of the activities involved in the idea of a circular economy are already established in our resort in an effort to minimise our carbon footprint.

We do care about our environment

# Reducing Environmental Footprint

- Online departmental meetings whenever possible
- Encourage bus service usage or car pooling, especially amongst staff in the housekeeping and kitchen departments
- Full financing of staff bicycles, over 40% of all our seasonal staff use bikes for coming to work
- Seasonal staff accommodation is near the hotel and walking to work is encourage, as it also is a healthy life style and reduces traffic congestions
- Recent room renovations led to furniture being given away to charities such as nursing homes for elderly people Wooden bed boards were given to local farmer who used it for fencing their property. Beds were given to various monasteries, child care homes and staff members
