

# ENVIRONMENTAL POLICY STATEMENT

NISSI BEACH RESORT strives to minimize the carbon footprint from its operations and is fully aware of its environmental responsibilities. Our Hotel has embarked upon an environmental journey for the continuous improvement and full compliance with the environmental laws and regulations. NISSI BEACH RESORT is proud of its achievements (awards granted by Travelife and Tui UK), which demonstrates a firm and steady commitment to environmental excellence.

More explicitly, the Hotel's environmental policy calls for the following:

- Integration of circular economy principles into the Hotel's operations to minimise environmental impact, reduce waste, conserve resources, and enhance sustainability.
- Adopt energy-efficient technologies and practices and utilize renewable energy sources.
- Optimize the use of resources by selecting sustainable materials, reducing consumption, and promoting energy and water efficiency throughout the Hotel.
- Implement strategies to reduce waste at the source, avoid products with excessive packaging and single-use plastics.
- Implement waste segregation systems in all areas of the Hotel to facilitate recycling and composting.
- Encourage the reuse of materials and products wherever possible and establish robust recycling programs to divert waste from landfills.
- Prioritise the purchase of products and services that are sustainably sourced, have minimal environmental impact, and are designed for longevity or recyclability.
- The integration of environmental aspects into our day-to-day operations.
- The development of a sense of environmental responsibility among all employees by actively protecting our natural environment.
- Setting of qualitative and quantitative targets to minimise the environmental impact from our operations; reduce greenhouse gas emissions, electricity and petrol consumption, and water consumption.
- Provision of on-going training to all staff on circular economy principles, waste management practices, and sustainability initiatives.
- Continual improvements in operations, emergency preparedness, and management oversight to increase the effectiveness and reliability of our environmental management system.

This policy serves as a framework for incorporating circular economy principles into our hotel operations, contributing to environmental sustainability, and enhancing the overall guest experience.

The Hotel's Environmental Management System is based on the requirements of the Circular Economy Model, Travelife, and ISO 14001 Standard, and all employees are expected to adhere to our environmental policy at all times.
